

CLEVER ROCKET CREATIVE DEVELOPMENT PLATFORM

THE VIRTUAL BRIDGE BETWEEN PAPER FORMATS AND STUDIO PILOTS

Paper formats and PowerPoint presentations can only communicate so much. Alternately, a fully produced pilot is extremely expensive and changes after delivery will come at even greater cost. Consider our development platform as an incredibly powerful and flexible tool which bridges the gap.

In this fast-paced world, change is inevitable. We are bringing cutting edge technology to the development of content for the broadcast industry. Whether it's breathing life into old formats, workshoping new formats or test piloting ANY format directly to the public.

Preview, play and present all of your studio ideas in a virtual environment that is simply brought to life within your laptop – and budget. Workshop without worry as your format is polished in our development platform LONG before committing to any studio costs.

Our development platform will enable you to go to completely new places not previously possible when developing, pitching and piloting your creative!

Format: Mac, Windows, Linux, Android, PlayStation, X-box, iOS, Apple TV, Web.
